

ANALYST, ASSOCIATE AND VICE PRESIDENT COMPENSATION REPORT 2016/17

Welcome to the fifth annual Arkesden Partners compensation report.

The shifts in the UK and global political landscapes in 2016 have been significant, further exacerbating the uncertain ongoing economic outlook.

For its own part the Banking sector continues to assess and attempt to adapt to that uncertainty. 2016 and early 2017 has seen the banks continue their direction of travel towards further risk reducing compensation strategies amongst the backdrop of generally weaker earnings notably for some of the European Banks.

In the mid and junior ranks the trend in remuneration continues towards lowering the bonus culture and placing greater emphasis on increasing fixed compensation elements.

We hope you enjoy the latest report.

Adam Cairns
Founder & Managing Partner
Arkesden Partners

Methodology

This is a report for the London based banks, carried out using Arkesden Partners Analyst, Associate and VP networks with willing participants who will remain anonymous.

The number of respondents to the report has increased by 21% year on year giving us yet further confidence in the reported numbers based on the volume and range of data we have gathered.

The accuracy of the survey will be limited by the word of mouth of the participants; however, we have attempted to mitigate this by gaining as many data points as we can and confirming the accuracy of the data with the banks themselves where possible.

The information was gathered after bonuses had been paid between January and March 2017.

Trends for 2016 compensation

Overview

It is our opinion based on all the data we have gathered, that the banks have mostly maintained or slightly increased year on year compensation.

Analyst Bonuses were generally on parity with last year, Associate and VP numbers were slightly down on last year. However, most banks paid increasingly high one off bonuses to the very best performers to reward and retain. Therefore the gap between these top performers and the rest of the pack has widened a reasonable margin.

Citi and Bank of America were noticeable in bucking this trend and slightly increasing their mean bonus payment across all their levels year on year.

In a well-publicised move, Deutsche Bank has scaled back its bonus pool in 2016 and this has clearly had an effect on this year's mean figures.

Analyst Programme Changes

The Analyst programme has been shortened now by all the banks. Most programmes run to a two and a half year window. Notably Goldman Sachs is now running a two year Analyst programme in London, we understand, before promoting to Associate 1 level. This corresponds to the more traditional pre MBA style Analyst programmes of the US based banks.

Our view at Arkesden is that this shortened Analyst training programme has come about for two reasons.

Firstly, for Winter bonus cycle alignment to senior levels enabling continuity in pay and reward structures as the Analyst programme shortens.

Secondly as a direct result of the high erosion rates of Analysts from Banking teams to join other sectors earlier in their careers. Opportunities now abound on the Buyside, Corporate Development and the Fintech market. There is perhaps evidence of the US style 'two years and out' culture developing in the London banks which we have not seen before.

Arkesden Alternatives

www.arkesden.com/alternatives

We are a leading search firm that focuses on placing individuals into the Alternatives market. We are London based but undertake mandates throughout Europe, Emerging Markets and the US. We have over a decade of experience and focus on placing individuals at the Director, Principal, Associate and Analyst levels. The Arkesden Alternatives Practice has consistently delivered both for our clients and candidates since its inception. Our clients range from larger global asset managers and banking teams through to mid market and specialist credit platforms.

Sectors include:

- Buy Side / Hedge Funds strategies
- Performing / Non-Performing Credit
- Distressed Debt
- Special Situations
- Direct Lending
- High Yield
- Private Debt
- Mezzanine
- Asset Backed Debt
- Leveraged Finance
- Restructuring and Debt Advisory.

Our approach

During our history we have built a very wide ranging network of professionals within our five core markets. This has been built from real belief and understanding of the importance many people place on their careers. We always aim to offer sound medium term career advice. This approach has led us to be recommended many times to other professionals and clients alike to build fresh relationships.
